Hoofddorp, 15 January 2016

## **Blackwood will present at torrefaction workshops, 25&26 January 2016 in Rotterdam**

Blackwood Technology B.V. (“Blackwood”) will participate and stage presentations at the two torrefaction workshops organized by the International Biomass Torrefaction Council (“IBTC”) and IEA Bioenergy Task 40 on January 25 & 26 in Rotterdam.

The workshop on the 25<sup>th</sup> of January focuses on the use of torrefied biofuel in the small and medium sized applications, such as the decentralized heating market. The second workshop on the 26<sup>th</sup> of January looks at the replacement of fossil coal by torrefied biomass in large scale power plants.

For more details about these workshops, visit the IBTC website at:

[http://www.biomassstorrefaction.org/ibtc\\_event\\_cat/all-events/current-events/](http://www.biomassstorrefaction.org/ibtc_event_cat/all-events/current-events/)

The International Biomass Torrefaction Council (IBTC) is an umbrella organisation of AEBIOM launched in 2012 and aiming at building the first EU platform for companies having common interests in the development of torrefied biomass markets. Currently, the IBTC initiative is supported by more than 20 companies worldwide. [www.biomassstorrefaction.org](http://www.biomassstorrefaction.org)
