Blackwood will present at Torrefied Biomass Webinar organized by the WBA and IBTC, 22 June 2016

Blackwood Technology B.V. ("Blackwood") will participate and present at the torrefied biomass webinar organized by the International Biomass Torrefaction Council ("IBTC") and World Bioenergy Association ("WBA") on June 22nd, 2016.

The webinar will give an overview of the current status and outlook of the torrefied biomass market. Based on its own experience with industrial scale production of torrefied biomass and the large scale co-firing of torrefied pellets, Blackwood's presentation will give an overview of the results of co-firing trials with torrefied biomass in pulverized coal power plants.

For more details about the webinar, visit the IBTC website at:
<http://www.biomassstorrefaction.org>

The International Biomass Torrefaction Council (IBTC) is an umbrella organisation of AEBIOM launched in 2012 and aiming at building the first EU platform for companies having common interests in the development of torrefied biomass markets. Currently, the IBTC initiative is supported by more than 20 companies worldwide.
